DETAILED ACTION

Allowable Subject Matter

1. Claims 4 and 8 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 4, the primary reason for indicating allowable subject matter is the inclusion of the limitation of first and second field effect transistors connected in series between the low path of the backlight lamp to the ground voltage source for connecting the low path of the backlight lamp to the ground voltage source in response to an output signal of the second switch and a resistor connected between the low path of the backlight lamp and the first field effect transistor, which is not found singularly or in combination within the prior art. The closest available prior art references teach of a first switching part, however, the references do not teach of the specific configuration of the first switching part as required by claim 4.

Regarding claim 8, the primary reason for indicating allowable subject matter is the inclusion of the limitation of including a capacitor connected between a drain terminal of the third field effect transistor and a drain terminal of the fourth field effect transistor and also a capacitor connected between the drain terminal of the fourth field effect transistor and the ground voltage source for an inverter device of a liquid

crystal display, of which could not be found singularly or in combination within the prior art. The closest available prior art references teach of a second switching part, however, the references do not teach of the specific configuration of the second switching part as required by claim 4.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
